

# DATA CENTER LOGISTICS

## MISSION-CRITICAL INFRASTRUCTURE. DELIVERED WITH PRECISION

PGL is a woman-owned and veteran-driven global 3PL. We specialize in the movement, staging, and installation of mission-critical infrastructure for secure, high-density data center environments. We support hyperscale, colocation, and enterprise data center operators with disciplined execution, hands-on service, and proven experience handling high-value, oversized, and sensitive equipment. Our highly-dedicated teams are built to operate inside controlled facilities where security, timing, and precision truly matter. We take great pride in supporting everything from individual rack moves to full site deployments.

### WHAT WE SUPPORT

- Hyperscale & enterprise data centers
- Colocation facilities
- OEMs and manufacturers supporting data center builds
- Power, cooling, and infrastructure providers

### CORE DATA CENTER CAPABILITIES

- High-Value & Secure Transport
- Movement of high-value infrastructure
- Shipping of populated equipment & sensitive components
- Risk-aware routing & carrier selection
- Highly secure and controlled chain-of-custody
- Designed for self-insured & risk-managed environments

### WHITE GLOVE DELIVERY

- Controlled delivery into secure, access-restricted facilities
- Floor protection, debris removal, & site-compliant handling
- Trained crews familiar with data center delivery protocols

### OVERSIZED POWER & COOLING EQUIPMENT

- Cooling units, power modules, & generator freight
- Project-based and out-of-gauge freight coordination
- Liftgate, rigging, & specialty equipment planning

### CRATING, PACKAGING & PROTECTION

- Custom crating & protective packaging solutions
- Anti-static handling, load securement, & shock mitigation
- Protection through long-haul and last-mile delivery

### WAREHOUSING & STAGING

- Secure short and long term storage options
- Pre-deployment staging and sequencing
- Consolidation and timed release aligned to site readiness

### PROJECT & PROGRAM MANAGEMENT

- Dedicated multi-move or multi-site deployments
- Site surveys, delivery planning, and execution oversight
- Accountability from origin through final placement

### VETERAN-LED INSTALLATION SUPPORT

- Disciplined, process-driven crews
- Teams experienced in controlled environments
- Positioning, placement, & handoff to engineering teams
- Built for high-security, rules-based operational settings

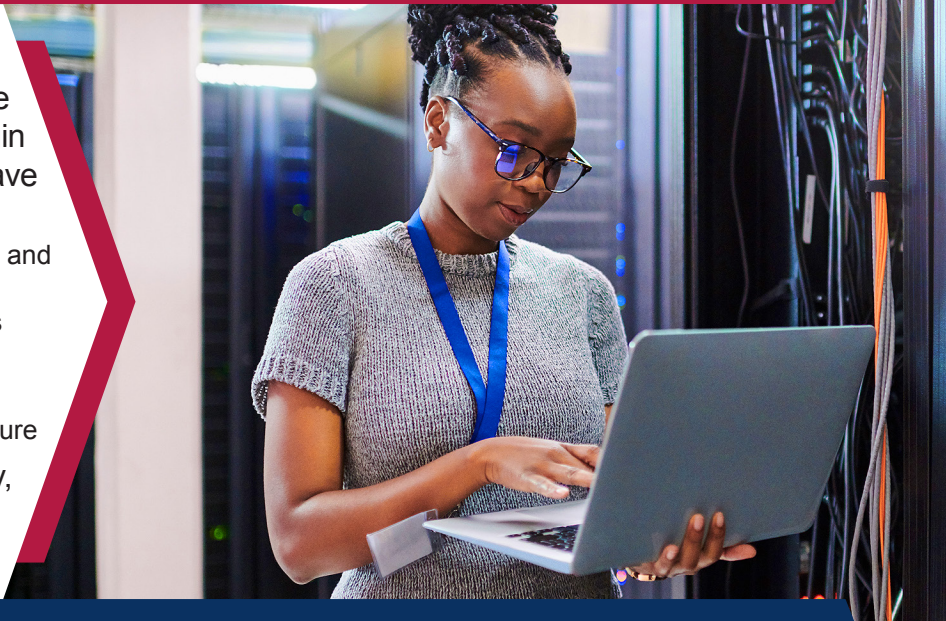

## TECHNOLOGY & SHIPMENT VISIBILITY

### REAL-TIME VISIBILITY & CONTROL

Gain real authority across the full lifecycle of all your data center shipments. From origin pickup through final inside delivery, you'll have full access to oversight.

- Centralized access to documentation, like COIs, and compliance records
- Authority over all access, timing, or site changes
- Live shipment tracking with milestone updates
- Proactive exception management
- Visibility for high-value, time-sensitive infrastructure

All of this is in place to help ensure clarity, accountability, and confidence throughout every single shipment.

### INSURANCE & RISK MANAGEMENT

PGL is built to support high-value, self-insured, as well as risk-sensitive data center environments.

- Experience managing per-unit high-value shipments
- Aligned & balanced insurance & liability structure
- Chain-of-custody controls to help reduce exposure during transport and inside delivery
- Our fine-tuned approach protects both the asset and the operation without slowing execution
- Carrier selection based on coverage thresholds, equipment type, & delivery requirements

### COMPLIANCE • CERTIFICATIONS AND OPERATIONAL CREDENTIALS

PGL operates with the discipline required for secure, regulated, and access-controlled facilities. This tried-and-true compliance posture enables seamless execution where precision and accountability are non-negotiable.

- Proven experience delivering into secure, sensitive, and credentialed environments
- Highly-trained personnel familiar with site protocols, access procedures, & delivery controls
- All Certifications along with registrations supporting regulated and high-security freight movement
- Documented SOPs for high-value handling, inside delivery, and controlled facilities

### WHY PGL?

No matter your business size, our experts create custom quotes for your shipment based on what you're shipping and current market rates. Trust us for our:

- Proven global performance in high-value, regulated, and secure environments
- 24/7/365 live operations support
- Woman-owned and veteran-driven organization
- Speed of a specialist with the scale of a global provider
- Hands-on service model
- No call centers
- No hand-offs
